

RONAK VERMA

.Net Developer / Web Developer

+917870079600 | +9779823595428 | ronakverma121@gmail.com | [LinkedIn](#)

SUMMARY

Motivated software developer with a primary focus on .NET Core and ASP.NET web development, alongside hands-on experience in building full-stack web platforms and C# desktop applications. Proficient in building scalable web APIs and backend services using Entity Framework Core and PostgreSQL, with additional exposure to Python and Django. Experienced across the full development lifecycle, from designing responsive user interfaces to managing database integrations and desktop workflows. Actively seeking opportunities where I can apply strong OOP fundamentals, contribute to web development projects, and continue growing as a .NET developer.

SKILLS

Languages: C#, Python, JavaScript, Django, HTML, PostgreSQL, MSSQL.

Web Design: NET Core, ASP.NET, Entity Framework Core, RESTful APIs, Tailwind CSS

Tools & Version Control: Git, GitHub, Postman, Visual Studio, VS Code

Additional Skills: Problem Solving, Creativity & Attention to Detail, Team Collaboration, Adaptability & Fast Learning.

PROJECTS

StreamSphere (Web-Based Video Sharing Platform) | .NET / C#

[GitHub](#)

- Built a scalable video-sharing platform using **Razor Pages** for the frontend, **ASP.NET Core / C#** for backend services, and **PostgreSQL** for relational data management.
- Integrated **FFmpeg** for dynamic video encoding and configured **Cloudflare** storage to deliver low-latency, cost-effective media streaming.
- Implemented **ASP.NET Core Identity** for secure authentication and integrated **Gemini AI** to power an intelligent video recommendation engine.

Tournament Management System (Desktop App) | C#, Win Forms

[GitHub](#)

- Engineered a Windows desktop application using **C#** and **Win Forms** to manage tournament workflows, participant entries, and multi-stage bracket progressions.
- Integrated **MS SQL Server** for robust data persistence and structured query execution.
- Automated email notifications to communicate real-time tournament stages and status updates to users.

Clerkly – Lightweight Accounting App (WIP) | C#, .NET

[GitHub](#)

- Developing a lightweight accounting desktop application tailored for small-scale businesses.
- Designed usability-focused workflows for invoice creation, transaction tracking, and direct document printing.
- Streamlined system architecture to prioritize operational simplicity, low memory usage, and quick UI performance

EXPERIENCE

Web Development Intern

Nov 2025-Jan 2026

Alpas Technology

Lalitpur, Nepal

Tech Stack: Django, REST APIs, JavaScript, Git, SQL

- Collaborated Worked on backend development with Django, building and testing RESTful APIs for internal projects
- Assisted in implementing basic authentication and understanding secure user access flows
- Gained hands-on experience with database operations, API integration, and Git.
- Utilized Collaborated with team members to learn development workflows, debugging, and code reviews.

EDUCATION

Bachelor of Computer Applications (BCA)

Biratnagar, Nepal

Mahendra Morang Aadarsh Multiple Campus

2021 -2026

- Focus: Software development, web development, and backend technologies*
- Relevant coursework: Data Structures & Algorithms (DSA), .Net Development, Python Programming with Django, Web Technology*

Last Updated: August 2026
